

INDORE MUNICIPAL CORPORATION

SWACHH BHARAT MISSION

No. **996**/MC/25

Date **12-3-26**

ORDER

To maintain cleanliness, control dust pollution, Control particulate matter, maintain Air Quality Index and manage construction and demolition activities within Municipal Corporation limits, all construction and demolition sites must follow necessary dust mitigation guidelines mentioned in the Construction & Demolition Waste Management Rules, 2016 and dust Mitigation guidelines issued by the Central Pollution Control Board (CPCB).

Following instructions are issued for strict compliance by all builders, contractors, developers, agencies, institutions, and individual property owners working on construction or demolition within Boundary of Indore Municipal Corporation:

- All construction sites and demolition sites must be fully covered from all sides using green net, dust screen, or suitable barriers to prevent dust and debris from escaping the premises.
- Construction materials such as sand, soil, cement, debris, murum, aggregate, etc., must not be left uncovered and should be properly stored.
- Regularly spraying water at construction and demolition sites is required to control dust emissions.
- Transportation of construction and demolition waste must be done using properly covered vehicles to prevent spilling on roads and public spaces.
- No construction materials or debris should be left scattered on roads, drains, footpaths, or public land.
- The responsible property owner, builder, contractor, or executing agency will be held accountable for following these instructions.

Any violation of the above directions shall be liable for action under applicable provisions of the Environment (Protection) Act, 1986, Air (Prevention and Control of Pollution) Act, 1981, Construction & Demolition Waste Management Rules, 2016 for control of fugitive dust emissions from Construction & Demolition activities and other applicable rules and regulations.

Commissioner

Indore Municipal Corporation
